USER GUIDE

Welcome to the Tank War!
This guide will help get a player on their feet in trying out Tank warfare.

WHAT IS THIS TANK WAR?

Tank war is a game that a player controls his/her tank to move in the map, shoot bullets to take down enemy tanks and protect its base.

There are three environment maps with difficulty level 1~3. The player may choose difficulty level in the beginning menu.

HOW TO CONTROL AND WIN THE GAME?

The player uses keyboard direction keys to control the user tank's movement, and the space key to shoot.

When the player tank shoots down an enemy tank, 1 bonus point will be given to the player.
If the accumulated total points >=10 in the level 1 map, the player wins.
If the accumulated total points >=20 in the level 2 map, the player wins.
If the accumulated total points >=30 in the level 3 map, the player wins.

Enemy tanks can shoot as well. The player tank has three lives in total, and the enemy tanks have one each. When the player tank gets hit, the player loses one life, vice versa.
When the player loses all three lives, the game is over.

Once the player's base got hit, the game is over.

The environment contains blocks, tanks cannot go through those. However, wooden blocks (brown) are breakable with bullets. The player may shoot blocks to clear its way.
